

Lithium-Ion – Standard Packs

rechargeable

We assemble Li-Ion batteries from cells of well-known manufacturers and **UL-recognized** components.

All batteries (in shrink tube) are equipped with **PCM** and **150mm wire**.

For easy implementation in your application, all batteries already comply with **UN section 38.3 transportation test**.

The custom-built PCM ensures high safety during operation.

Order no.	Type	incl. NTC	Nominal Capacity (mAh)	Nominal Voltage (V)	Max. continuous discharge (A)	Dimension (mm) ca.	Weight (g)

Li-Ion Batteries can be customized to fulfill your special needs.

Possible features for customized Li-Ion Batteries:

- Different connector types
- Single-cell balancing
- Integrated charging circuits
- Fuel Gauge

Detailed datasheets available upon request.
