

D<mark>YNAMIS</mark> LITHIUM-LINE

LI-130 /S (ER14505, Size AA)

Lithium Thionyl Chloride Cell

Electrical characteristics

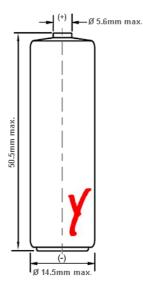

(Typical values for cells stored for one year or less at +25°C max.)

Nominal voltage	3.6 V
Nominal capacity at 1.0 mA with 2.0 V cut off voltage (25 °C). The capacity restored by the cell varies according to current drain, temperature and cut-off voltage.	2 [.] 700 mAh
Max. recommended continuous current	100 mA
Pulse capability Typically up to 200 mA / 0.1 second pulses, drained every 2 min. (25°C) from undischarged cells with 10 µA base current, yield voltage readings above 3.0 V. (The readings may vary according to the pulse characteristics, temperature, and the cell's previous history. Fitting cell with a capacitor is recommended in severe conditions applications.)	200 mA
Operating temperature range (Operation at temperature different from ambient may lead to reduced capacity and lower voltage plateau readings.)	-55°C ~ +85°C
Storage temperature (recommended for max. 60% rel. humidity, according other demands contact DYNAMIS)	30°C max.

Physical characteristics

Height	50.5 mm
Diameter	14.5 mm
Weight ca.	19 g

Drawing:

CE

Batterien

Key features

- n High and stable operating voltage
- High minimum voltage during pulse application
- Low self discharge rate (less than 1 % after 1 year of storage at +25°C)
- n Stainless steel container
- n Hermetic glass-to-metal sealing

n Fire, explosion and severe burn

heat over 100°C or incinerate.

n Do not expose cell or contents to

n Do not recharge, crush, disassemble,

- n Non-flammable electrolyte
- n UL certified

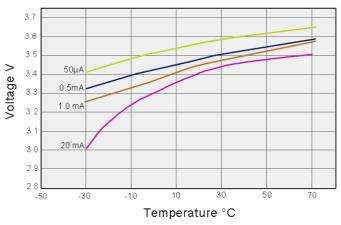

Warning

hazard.

water
